

THE FUTURE OF TECH STARTS HERE.

ABOUT BEYOND CODE COLLECTIVE

Beyond Code Collective (Beyond Code) is a transformative nonprofit bridging the gap between inspiration, training, and employment in tech. We connect learners to accessible education, hands-on opportunities to build with emerging technologies, and clear pathways to launch and grow meaningful careers. Designed for learners of all ages and backgrounds, Beyond Code prepares individuals to thrive in a tech-powered world and achieve lasting career mobility.

WHY NOW

While 77% of employers intend to upskill their teams for emerging technology demands, access to the training and tools needed to succeed remains uneven.

OUR MISSION

Beyond Code's mission is to build intergenerational equity in the technology of today and tomorrow. That mission rests on three commitments:

INTERGENERATIONAL EQUITY

An ecosystem where all generations participate; not a pipeline that serves one age group, but a model that meets learners wherever they are in life.

ALL TECHNOLOGIES

From digital fluency and data literacy to automation, cybersecurity, and responsible AI, we prepare learners for the full range of tools they'll encounter.

TODAY & TOMORROW

We deliver programming that keeps communities relevant now and ready for what's next as the workforce changes in real time.

Beyond Code Collective is an integrated ecosystem creating sustainable pathways to quality jobs while strengthening the digital capacity of mission-driven organizations. Its learner experiences include The Forge (our tech learning hub), Beyond Code Catalysts (workforce development & 18+ pathways), and Code Along (accessible digital how-to learning).

With expertise from corporate leaders and technologists, Beyond Code not only helps learners build strong foundations but also provides technical skill development, career training, job placement, and entrepreneurial support.
